SUMMARY

1+ years experience in an eCommerce startup. First hand experience gathering user requirements, designing databases and implementing business solutions for CoolMix LLC. My goal is to become a full stack developer by expanding my technical skills in UX, Middleware, Web technology and No SQL databases. (What will you do with this knowledge of business and technology?) (ex: After working in the ecommerce business, I would like to create my own online businesss where I sell xyz goods/services)

EDUCATION

BS Finance (2018)
University of Delaware, Newark, DE

Notable Business Courses: Business Intelligence and Analaytics, Information Systems, Strategic Management, Fixed Income Securities, Captial Markets, Financial Investments, International Finance

PROFESSIONAL EXPERIENCE

01/2017-Present: CoolMix Group LLC (CoolMix.com), New York, NY
Collaborated in the design and implementation of CoolMix's eCommerce transactional database using Microsoft SQL Server. Worked on the implementation of transaction, product, vendor, client and inventory tables.

Used tables, triggers and stored procedures to to calculate business metrics and store the price history of products. Optimized the query time by maintaining exisiting stored procedures, triggers and and table indices as needed.

Skills

Microsoft SQL Server, JavaScript, Capsim, Powerpoint, Excel, Word, Access

Used Capsim to simulate the production and sales of an electronic parts manufacturer. Used analytics to calculate the projected marketshare within the span of 10 years. (notable features of Capsim?) Researched suppliers raw materials and potential clients

User 1		User 2
Private key 1		Public key 1
Encrypts message using Private key 1	Send public key 1 to User2	Decrypts User 1's message
	Sends encrypted message after	using Public key 1
	User2 receieves public key1
